Countries in yellow are endemic <sup>1</sup>Data in WHO HQ on 25 Nov 2014 for 2014 data and 24 Nov 2015 for 2015 data.

<sup>2</sup>Wild viruses from environmental samples, contacts & other sources. <sup>3</sup>In March 2014, a serotype 1 wild poliovirus was detected in an environment specimen from Brazil, further investigation indicates this is an isolated event without evidence of circulation. <sup>4</sup>Results are based on L20B positive culture. Prior to reporting week 16, 2014, results were based on a combination of direct qRT-PCR on RNA from concentrated sewage and L20B positive culture. <sup>5</sup>The 2010 total includes cases with inadequate specimens that were exceptionally classified as confirmed polio based on their association with the WPV1 outbreak. <sup>6</sup>Includes 1 case in 2012 with a mixture of W1W3 virus. <sup>7</sup>As of 27 Sep 2015, Nigeria no longer classified as endemic. NA - Most recent case had onset prior to 1999.
